

Riva Iqbal Almero

Web Developer

rivaalms@proton.me • +62 895 401 998 822 • Bandung, Indonesia

Summary

Web Developer with experience in building and maintaining web applications, leveraging modern frameworks. Experienced working with Agile environments and adapting to various industry challenges. Consistently implementing best practices to enhance application performance.

Experience

Programmer

Mar 2023 - Present

Jasa Medika Transmedic

- Developed Telemedicine Transmedic, a healthcare platform for medical facilities to provide online consultation service for their patients.
- Developed Faskinlink, a platform designed to help healthcare professionals deliver medical services in remote areas using health information systems, medical devices integration, telemedicine support, and a real-time ambulance command center.
- Contributed to the design, development, and support of both new and existing web applications, adhering to best practices in web development and actively participating in code reviews to ensure high code quality with zero critical bugs detected post-release.

Education

Bachelor of Computer Science

Feb 2024 - Expected graduation: Feb 2026

Universitas Widyatama

- Building a Bachelor's thesis project that involves developing a real-world system, focusing on practical software engineering principles, clean architecture, and scalable data processing.
- Gained strong foundation in algorithms, data structures, databases, and software engineering, supporting problem solving and front-end performance optimization.
- Experienced in team-based development, version control, and applying engineering best practices across projects and coursework.

Associate Degree in Informatics Engineering

Sep 2019 - Aug 2022

Politeknik Negeri Pontianak

- Developed and deployed a Helpdesk Ticketing System using Laravel and MySQL for Bank Pembangunan Daerah Kalimantan Barat (Bank Kalbar), streamlining IT issue resolution and improving department-wide communication.
- Earned Associate Degree in Informatics Engineering from Politeknik Negeri Pontianak (2019-2022) with focused coursework in Database Management, Software Engineering, and Web Development, providing a strong foundation in full-stack development principles.
- Leveraged knowledge of software development methodologies gained through coursework to effectively manage and contribute to project lifecycles, ensuring timely delivery and adherence to project requirements.

Skills

JavaScript, TypeScript, Vue.js, React, Nuxt, Next.js, Node.js, HTML, CSS, TailwindCSS, SASS, PHP, Laravel, Express.js, Elysia.js, MySQL, PostgreSQL, MongoDB, Git, Docker, Postman
